Problem: How to work with Value-Based Groups?

What is a value-based group?

- *Religious*
- *Political*
- *Any group motivated by a set of values*

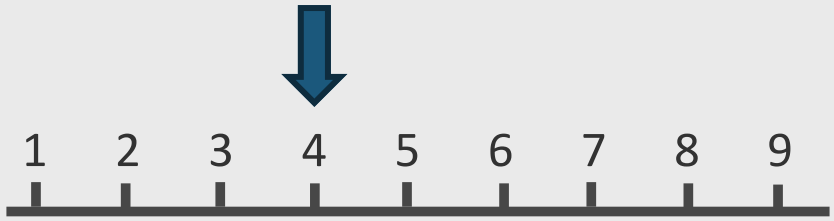
Who needs to work with value-based groups?

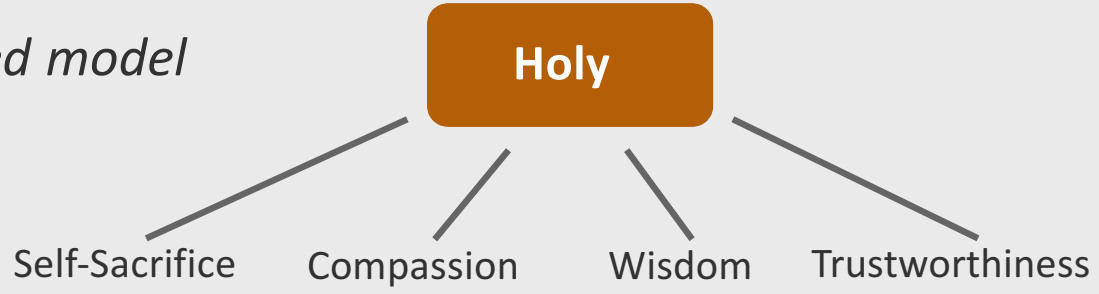
- *US Government*
- *Humanitarian Groups*
- *Business Leaders*

UVA Initiative on Conflict, Politics, and Religion

1-9 Linguistic Rigidity Scale

- *Number of definitions not the definition itself is what matters*
- *Venuti et al. automated model*





Objectives & Goals

Large-Scale Goals:

- *Real-time recommendations to organizations on the ground*

Team Goals:

- *Tune the Signal Processing Model*
- *Test a Deep Learning Model*
- *Language Agnostic*
- *Other Groups*

Technical Approach

Technical Approach: Signal Processing

Performative Signals

- *Number of judgments (noun + “to be” verb + adj/adv)*
- *Context Vectors (Semantic Density and Cosine Similarity)*
- *Network Analysis (Eigenvector Centrality)*

Semantic Signals

- *Topic Modeling*
- *Sentiment Analysis*

Technical Approach: Context Vectors

sinners should be welcome. However, some churches are quick to boot people out if they don't live up to their standards. I heard about a preacher whose wife was in the hospital and dying of cancer. The elders of his church came to the hospital to see them. The preacher thought they were coming to pray for his wife, but instead, they came to fire him. I have no idea what that preacher did that was so bad, but those elders demonstrated no mercy at all. I have heard of other horror stories where people have been driven out of a church for one thing or another. No mercy was demonstrated, only rugged legalism. But Jesus said, "I desire mercy, not sacrifice." Matt. 23:23 "Woe to you, teachers of the law and Pharisees, you hypocrites! You give a tenth of your spices: mint, dill and cummin. But you have neglected the more important matters of the law: justice, mercy and faithfulness. You should have practiced the latter, without neglecting the former." The Pharisees of old were scrupulous or careful

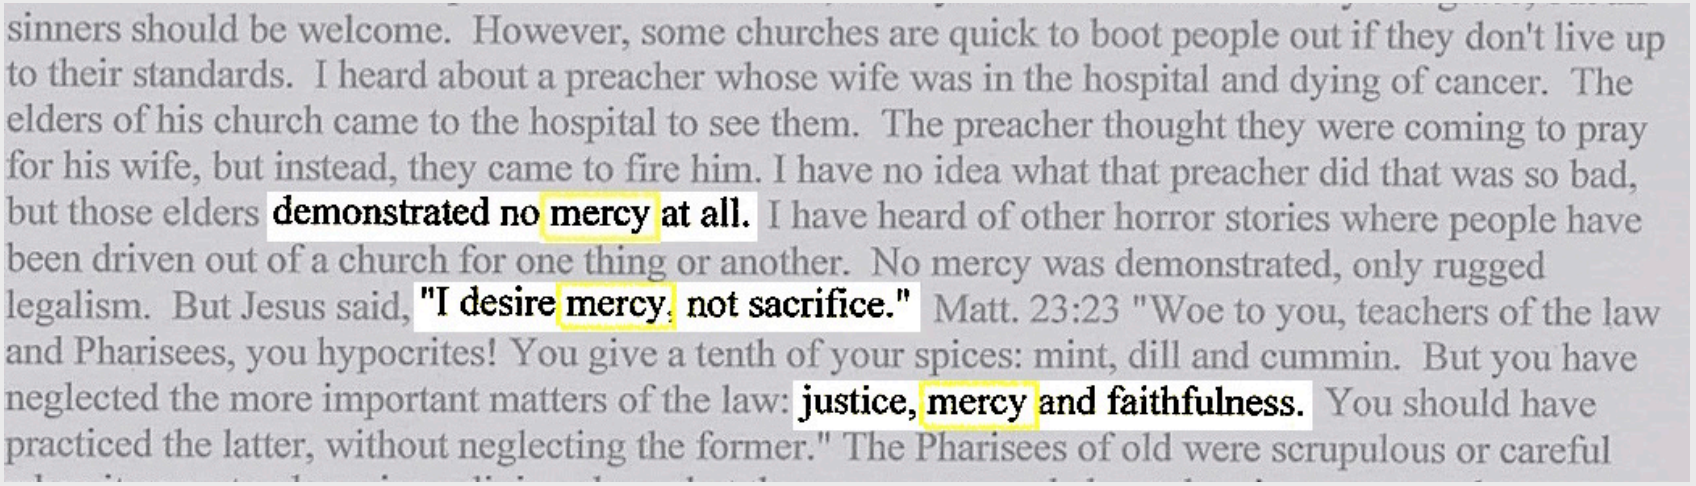
Collect words in context vector

Technical Approach: Context Vectors

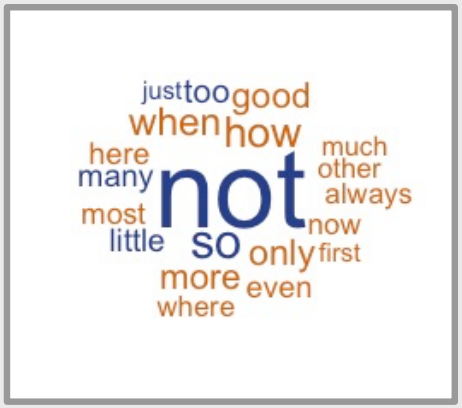


sinners should be welcome. However, some churches are quick to boot people out if they don't live up to their standards. I heard about a preacher whose wife was in the hospital and dying of cancer. The elders of his church came to the hospital to see them. The preacher thought they were coming to pray for his wife, but instead, they came to fire him. I have no idea what that preacher did that was so bad, but those elders **demonstrated no mercy at all.** I have heard of other horror stories where people have been driven out of a church for one thing or another. No mercy was demonstrated, only rugged legalism. But Jesus said, **"I desire mercy, not sacrifice."** Matt. 23:23 "Woe to you, teachers of the law and Pharisees, you hypocrites! You give a tenth of your spices: mint, dill and cummin. But you have neglected the more important matters of the law: **justice, mercy and faithfulness.** You should have practiced the latter, without neglecting the former." The Pharisees of old were scrupulous or careful

- **Repeat for all occurrences of keyword**
- **Singular Value Decomposition to vector of length 100**
- **Calculate Average Semantic Density and Distributional Co-occurrence Score**

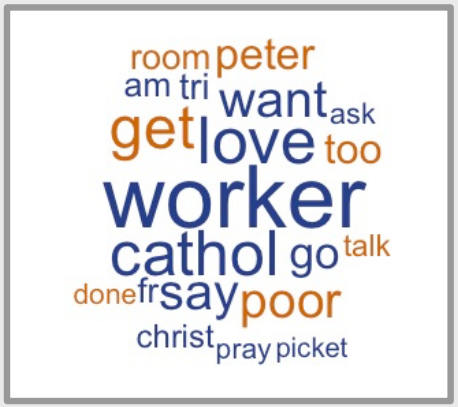
Value Words

Previous Method



TFIDF Method w/Pronouns

TFIDF Method w/out Pronouns



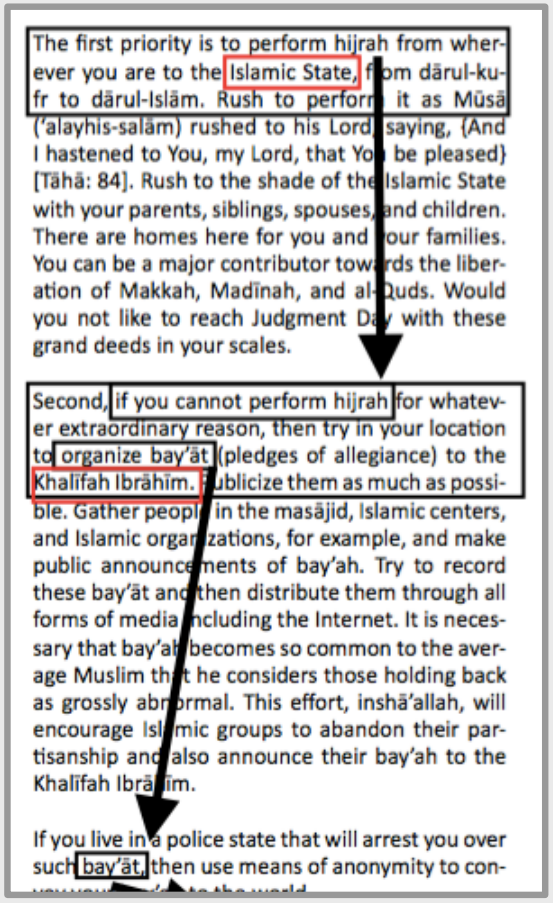
Judgment Classification

Previous Method:

- *Judgment = (noun + "to be" verb + adj/adv)*

New Method:

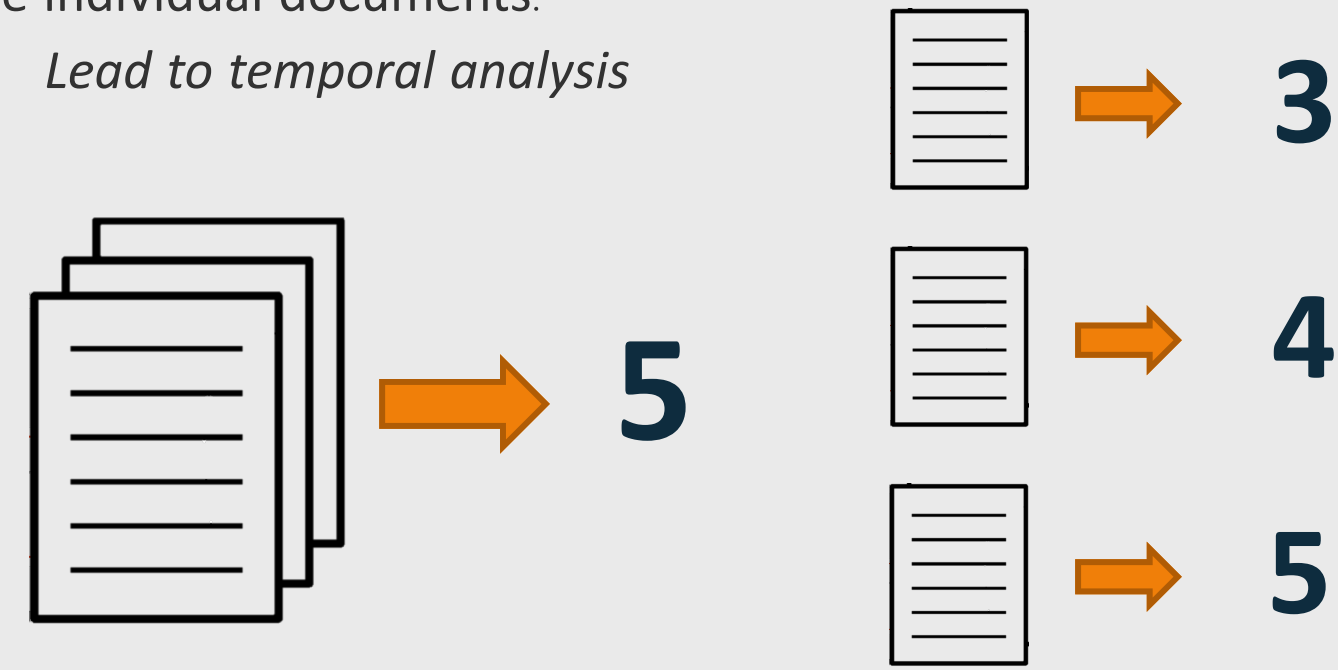
- *Judgment = pronoun + key word*



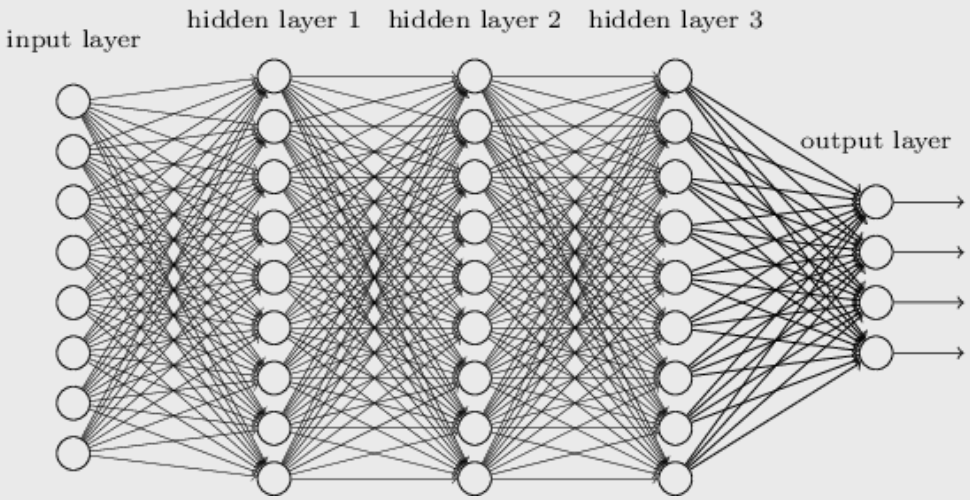
Model Revisions

Instead of scoring groups, we're moving towards a model that will score individual documents.

- *Lead to temporal analysis*



Technical Approach: Deep Learning



- Multinomial regression classifier
- Let the program learn which words are important
